

ANDIAMO INTERNATIONAL LTD CASE STUDY

The company was spending countless hours in spreadsheets to generate business critical reporting

AT A GLANCE

Challenges

- Silo's of individuals with business knowledge
- Ineffective use of resource time and expertise
- Risk of incorrect data entry

Benefits

- 23% FTE resource time saving
- Instant generation of complex reports
- One source of the truth

Onyx has been a revelation to our business!

Leon and his team created a new bespoke system for Andiamo, cleansing and migrating our existing database to a cloud based environment and enhanced our excel based reporting with in application bespoke reports, that have given our business a greatly enhanced view of our sales and invoicing.

Dawn Di Mambro

Company Director at Andiamo International Ltd

OBJECTIVES

Work with key stakeholders within the business to understand data sources and definitions of key metrics. Document the process and bring disparate data in to a single source of truth. Automate the process and deliver industry leading, accurate reporting to the Executive board members.

SOLUTIONS

Cleansed source data from multiple disparate data sources and migrated this to a cloud based environment. Demystified and documented complex business logic, agreeing metric definitions with stakeholders at all levels within the business. Automaed the generation of business critical reports.

BENEFITS

23% FTE resource time saving

An instant return on investment for the business being able to free up the time of highly skilled individuals to focus on tasks.

Instant generation of complex reports

Automating, documenting and agreeing complex logic across the business allowed everyone to have faith that the data was accurate and as expected in all departments.

One source of the truth

Improved data quality, data accuracy, and data integrity through removal of data silos and adoption of a data warehouse model, increasing data transparency.
