ONYX DATA

EMPOWERING EDUCATION: HOW ONYX DATA HELPED A LEADING UK ENGINEERING UNIVERSITY IMPROVE REPORTING AND UPSKILL STAFF THROUGH DATA-DRIVEN SOLUTIONS

AT A GLANCE

Challenges

The university was facing challenges with managing their data and needed a more streamlined way to access and analyse information about student performance.

Onyx Data implemented a data-driven solution to improve reporting and upskill the university's staff.

Streamlined Data Access

Onyx Data's solution helped the leading UK based engineering university to streamline their data access and analysis, improving reporting capabilities, upskilling staff, and providing support for new technology implementations.

By delivering a teaching and student performance reporting platform, providing comprehensive training, and ad hoc support for a greenfield Microsoft Power BI implementation, Onyx Data helped the university achieve greater data-driven decision-making and student retention rates.

KEY OBJECTIVES

- Deliver a teaching and student performance reporting platform.
- Upskill staff to improve data literacy and usage.
- Provide ad hoc support for a greenfield Microsoft Power BI implementation.

KEY METRICS

1. Improved Reporting: Onyx Data's solution improved the university's reporting capabilities, allowing them to create more informative and actionable reports on student performance, improving student retention rates by 10%.
2. Upskilling: Onyx Data provided a comprehensive training program to upskill the university's staff in data literacy and usage, resulting in a 63% increase in the number of staff members using data to make decisions.
3. Ad Hoc Support: Onyx Data provided ad hoc support for a greenfield Microsoft Power BI implementation, ensuring the university had the necessary support to make the most of their new technology investment.
